

To Our Valued Partners -

Dignity Health team members are here for you and your family. We appreciate being your preferred health care and charity partner. As we have been discussing in our *Dignity Rising* campaign, our team works very hard to keep up with the expanding need for high-quality health care in the southeast valley. Unfortunately the need is rapidly increasing at alarming rates both the President and the Governor of Arizona declared a **Public Health Emergency to confront the coronavirus (COVID19)**.

These are important proactive measure to assist providers in preparing to care for the percentage of people who contract the disease and will need

hospitalization. Medical Centers need supplies and equipment to best care for hospitalized patients and protect the front-line care teams.

Please consider a quick and immediate donation, of any amount, to our [Emergency Response Fund](#). 100 percent of these funds will go directly towards the equipment, tools and supplies needed to care for our most vulnerable populations, likely turning to us in need in the days ahead.

We have also enacted strict visitation and security policies at Dignity Health facilities. We will be holding meetings and gatherings via video and the internet and following best practices in "social distancing." The leaders are meeting daily to respond to the information and changing conditions, thus ensuring the safety of our patients, their families and our caregivers. As more information is available or the situation changes, I will communicate with you what I know. You may also read updates on the main web pages of each hospital.

Right now, I know I am very proud to work at Dignity Health with amazing doctors, researchers and caregivers who work tirelessly to care for the sick. I am also proud to count you as a supporter of our very important mission. You bring hope and healing to our patients.

Blessings,

**Aaron Peace, President**
